class diagram activity diagram

```
graph TD; Start(( )) --> login(login); login --> submit[submit details]; submit --> get[get details]; get --> Decision{ }; Decision --> penalty[penalty as per law]; Decision --> issue[issue passport]; issue --> End(( ))
```

The diagram illustrates the workflow of a passport management system. It begins with a start node (red dot) leading to the 'login' activity. This is followed by 'submit details', 'get details', and a decision point (yellow diamond). From the decision point, the flow branches into two paths: 'penalty as per law' and 'issue passport'. The 'issue passport' activity leads to the final end node (red dot).
